

Calibry mini

AFFORDABLE & CONVENIENT SCANNING OF SMALL OBJECTS

Calibry Mini - is a handheld 3D scanner designed to capture objects from 2 cm to 30 cm in length.

Lightweight and fast the Mini provides high-quality data, capturing the most intricate detail. The device can digitize traditionally difficult black and shiny surfaces, as well as sharp edges.

It captures color, as well as geometry of the object and collects data at up to 3M points per second.

The Mini has a built-in touch screen, a 5m cable and uses cameras developed specifically for the device.

The scanner will be perfect for:

Medical professionals

Museums

Schools and universities

Technical specifications

Accuracy	Up to 0.07 mm
Accuracy over distance	Up to 0.1 mm over 1 m
Point resolution	Up to 0.15 mm
Depth of view	180 — 300 mm
Field of view	Min - 86x115 mm Max - 144x192 mm
Texture	Yes
Light source	Blue LED
Frame Rate	25-30 fps
Data Acquisition speed	3M points/sec
Multi-core processing	Yes
Weight	900 gr (1.9lbs)
Touchscreen	Yes, 4 in
Software	Yes, included in the price
Operating temperature	+5/+40C
